*Post-resuscitation & Pre-transport
Stabilization of Sick Newborns*

Guidelines for Neonatal
Healthcare Providers - 5th ed.

**Thursday
March 29, 2012**

Anderson Hospital
Maryville, IL

Sponsored by:
Perinatal Outreach Services

Program Goal

Transporting Newborns the STABLE Way is a mnemonic based program developed by Kristine Karlsen, MSN, RNC.

Ms. Karlsen is a neonatal nurse practitioner in a level III NICU in Park City, Utah.

STABLE is based on extensive literature review, research, and input from nurses, respiratory therapists and physicians. The goal of the STABLE program is to provide a concise guideline for neonatal pre-transport stabilization activities to be used by community hospital caregivers.

Target Audience

Staff working in labor and delivery, postpartum, well baby nurseries, and level 2 or 3 nurseries.

Nurses or physicians working in an emergency department who may be involved with unexpected deliveries of sick and/or premature infants.

Content

Establishing IV access, monitoring & normalizing the blood sugar.

Concepts of thermoregulation and the prevention of cold stress.

Supporting oxygenation and ventilation.

Maintaining a normal acid-base balance and interpretation of blood gases.

Supporting the blood pressure and normalizing the heart rate.

Interpretation of a CBC by calculating the Absolute Neutrophil Count and Immature to Total Neutrophil ratio.

Supporting, educating & maintaining involvement of the family.
